ARRANGE ME	JUST LIKE THE CLASSIC KID GAME WHERE YOU HAVE TO GET ALL THE #S IN ORDER WHILE SHIFTING THE SQUARES AROUND WITH THE ONE OPEN SPACE. YOU CAN ALSO CHANGE THE GAME FROM #S TO LETTERS OR PICTURES.
CRAZY COPY (LIKE OLD GAME SIMON)	YOU HEAR A SOUND AND SEE A LIGHT AND YOU HAVE TO TAP THE LIGHT/SOUND WITH INCREASING COMPLEXITY. WORKS WITH MEMORY.
4 Pictures 1 word	In this game you have to look at 4 pictures and decide what "one" word reflects them all. you have letters to choose from and earn game coins for correct answers. if you need clues or help solving the puzzles you can use the coins to get hints or narrow down letter choices.
94 seconds	In this game you have 94 seconds to answer as many categories as you can. you are given a category and a letter and need to think of something in that category beginning with that letter. This can be very difficult as "a car dealership that starts with K" can be challenging on the spot knowing that the timer is ticking away your time. They provide answers at the end to cross reference with what you chose and you are given points for correct answers.

### Augmentative ALternative Communication (AAC)

sonoflex Lite

this is a free version that allows you to use Preset boards for various communicative purposes. It is a Direct selection system and has voice output. The Lite version only allows so many uses and then becomes inoperable. The full version is around \$99 but does allow you to customize boards and add vocabulary.

Click N Talk

this is a very user friendly app that allows you to use your own pictures to create different communication stories and boards. You can record your own voice for words up to sentences for each picture. Pictures are large and easily accessed by the child even with fine motor difficulties.
